

Standard rock bits with diameters 2-3/8" to 6-3/4" designed for mining, geophysical and geotechnical drilling

Standard rock bits available in diameters 7-1/2" to 26" used for water well drilling, geophysical and oil and gas drilling

Steel tooth and tungsten carbide heavy duty rock bits with sealed journal bearings manufactured in diameters 5-7/8" to 26" for oil and gas drilling

Air circulation rock bits for blast-hole in size 5-5/8" to 12-1/4"

Motor bits in sizes 5-7/8" to 26"

PDC bits in sizes 8-1/2" and 12-1/4"
